In this concern, students of different departments fill online survey form. Hence, significantly result comes out. From this report we analysis that majority of the students are satisfied with the atmosphere of the college.

It was observed from the outcomes that some of the students were feeling nervous while sharing their views in front of their classmates in open. They have anxiety issues or we can say they have open discussion phobia. So we are planning to conduct a counseling session for the students, who are facing problems and try to tackle their issues in convenient way. So that in future they can feel free to share their problems without any hesitation, so that each and every student who get enrolled herself in the college will enhance their level of learning to achieve their desired targets

Meanwhile it was also observed that some of the students were facing issues with non-teaching staff in terms of daily interactions they have for their queries. For this we will conduct activities to raise their confidence and special session to resolve this problem will be planned in the coming semester. Further looking forward for corrective measures by various means to solve above problems and awareness among them.
