

## **PROGRAM OUTCOMES & COURSE OUTCOMES**

### **BACHELOR OF ARTS (B.A.)**

1. The students acquire knowledge in the field of social sciences, literature and humanities which make them sensitive and sensible enough.
2. The B.A graduates will be acquainted with the social, economic, historical, geographical, political, ideological and philosophical tradition and thinking.
3. The program also empowers the graduates to appear for various competitive examinations or choose the post graduate program of their choice.
4. This program enables the students to acquire the knowledge with human values framing the base to deal with various problems in life with courage and humanity.
5. The students will be ignited enough to think and act over for the solution of various issues prevailed in the human life to make this world better than ever.
6. Program provides the base to be the responsible citizen.

### **B.A. (ECONOMICS)**

<b>SEMESTER</b>	<b>PAPER</b>	<b>OUTCOMES</b>
I	Micro Economics	<ul style="list-style-type: none"><li>• Study of micro economics enables the students to have an understanding of theoretical aspects of the subject. Students are able to understand and define the basic concepts like consumer behavior, production, demand and supply etc.</li><li>• Students learn about the price and output determination of the firm and industry under different market forms. They also learn about the distribution system.</li></ul>
II	Macro Economics	<ul style="list-style-type: none"><li>• Students learn about macro economics and different theories regarding the determination of income and employment by different economists.</li></ul>

		<p>They learn about the consumption and investment functions. And also about the functioning of multiplier process.</p> <ul style="list-style-type: none"> <li>• Students learn about money and banking and become able to know about the theories of inflation and trade cycle etc.</li> </ul>
III	Public Finance & International Trade	<ul style="list-style-type: none"> <li>• Students get enabled to know about the different sources of govt. revenue like tax, public debt, deficit finance and its expenditure.</li> <li>• Students learn about the theories of international economics and international financial regulatory bodies like WTO, IMF, and IBRD etc.</li> </ul>
IV	Quantitative Methods	<ul style="list-style-type: none"> <li>• Provides students with the quantitative skills that are required to make business decisions. These skills involve using statistical, forecasting and estimation techniques. Formulation and application of mathematical models in business decision making scenarios.</li> </ul>
V	Development Economics	<ul style="list-style-type: none"> <li>• Students learn about different models of economic development and can become good policy makers in the future.</li> <li>• They also learn about the govt. planning in developing countries.</li> </ul>
VI	Indian Economy	<ul style="list-style-type: none"> <li>• Study of Indian economics enables the students to know about the basic structure and various sectors of Indian economy like agriculture and industry and various policies framed by govt. to develop the economy during and post independence period.</li> <li>• Students get familiar with various Indian problems like inflation, poverty, population, unequal</li> </ul>

		<p>distribution etc.</p> <ul style="list-style-type: none"> <li>• They also learn about the trends in foreign trade.</li> </ul>

## **DEPARTMENT OF MUSIC**

- The student is able to give a practical demonstration of ragas.
- He is able to demonstrate various aspects of ragas and their differentiation.'
- He studies about the theoretical aspects of prescribed ragas.
- Learns to write the practical compositions according to the Notation system.
- He understands the basic terminologies of Indian music.
- He studies about the life and contribution of the composers of Hindustani music, western music and Karnataka music.
- He learns about the music in the Vedic period and also studies the works of music scholars of the past.
- He studies about the Gharanas of Hindustani music.
- He makes an analytical study of various musical forms of Hindustani music and Karnataka music.

## **DEPARTMENT OF MATHEMATICS**

1. Enabling students to develop a positive attitude towards mathematics as an interesting and valuable subject of study.
2. A student should get a relational understanding of mathematical and statistical concepts and concerned structures, and should be able to follow the patterns involved, mathematical reasoning.

<b>B.A. / B.Sc (MATHEMATICS-I)</b>		
<b>SEMESTER</b>	<b>PAPER</b>	<b>OUTCOMES</b>
<b>I</b>	Paper-1 Plane Geometry	<ul style="list-style-type: none"> <li>• Thorough study of conic section, i.e. circle, parabola, ellipse, hyperbola.</li> <li>• Finding equations in various form of plane, line, sphere, cones.</li> <li>• Ability to understand transformation of axes in two dimensions.</li> </ul>
	Paper-II Calculus-I	<ul style="list-style-type: none"> <li>• Gain knowledge of fundamental concept of real numbers.</li> <li>• To understand the concept of limit and continuity.</li> <li>• Introduction to hyperbolic and inverse Hyperbolic function of real variable and their successive derivative Leibnitz’s theorems.</li> <li>• Students will be able to understand applications of mean value theorem</li> </ul>
		<ul style="list-style-type: none"> <li>• Introduction of De-Moiver’s theorem and its applications.</li> </ul>

	Paper-III Trigonometry & Matrices	<ul style="list-style-type: none"> <li>• Introduction to Eigen values and Caylay Hamiltonian theorem.</li> <li>• Introduction to different types of matrices.</li> <li>• Learn to solve system of linear equations.</li> </ul>
II	Paper-I  Solid Geometry	<ul style="list-style-type: none"> <li>• Thorough study of sphere, cone, cylinder.</li> <li>• Find the equations of ellipsoid, hyperboloid, and paraboloid.</li> <li>• Concept of transformation of axes and rotation of axes.</li> </ul>
	Paper-II Calculus- II	<ul style="list-style-type: none"> <li>• Introduction to curve tracing and curvature etc.</li> <li>• Student will be able to understand successive differentiation and integration of Hyperbolic functions.</li> <li>• Application of definite integrals.</li> <li>• Introduction to numerical integration with various methods.</li> </ul>
	Paper-III Theory Of Equations	<ul style="list-style-type: none"> <li>• Ability to analyze a problem, identify and define the computing requirements, which may appropriate to its solution.</li> <li>• Students will be able to understand Euclid algorithm and complex roots of real polynomial and Descartes' rule of signs.</li> </ul>
<b>B.A./B.SC (Mathematics-II)</b>		
III	Paper-I Advanced Calculus-I	<ul style="list-style-type: none"> <li>• Basic knowledge of continuity and differentiability of function.</li> <li>• Study of Schwarz's, Young's and Euler's theorem and its applications.</li> <li>• Be familiar with Euler's theorem, Taylor's theorem, Jacobians', Envelops, Evolutes, and Lagrange's multiplier method.</li> </ul>

III	Paper-II Differential Equations-I	<ul style="list-style-type: none"> <li>• Students will be able to solve first order differential equation utilizing the standard techniques for separate, exact, linear, and homogenous.</li> <li>• Students will be able to find the complete solution of a differential equation by various methods, methods of Variation of parameters, changing the dependent and independent variables.</li> </ul>
	Paper-III Statics	<ul style="list-style-type: none"> <li>• Thorough study of statics.</li> <li>• Study of Varignon's, Lami's, <math>\tau</math>-<math>\mu</math> theorems and their applications.</li> <li>• Study of friction and center of gravity.</li> <li>• Understand simple Harmonic motion and relative motion.</li> <li>• Study of moments and couples.</li> </ul>
IV	Paper-I Advanced Calculus- II	<ul style="list-style-type: none"> <li>• Basic knowledge of sequence, Bounds of sequence, convergent and divergent.</li> <li>• To learn Cauchy's theorem on limits, Bolzano Weirstrass theorem, Cauchy's convergent criterion.</li> <li>• Ability to analyze a sequence and using the appropriate test, i.e. P-test, comparison test, Cauchy's integral test, Root test etc.</li> </ul>
	Paper-II Differential Equations-II	<ul style="list-style-type: none"> <li>• Student will be able to solve differential equations by Power series method.</li> <li>• Concept of Bessel functions, Legendre's functions and their recurrence relations.</li> <li>• Concept of partial differential equations</li> <li>• To understand the Laplace transformations</li> </ul>
	Paper-III Dynamics	<ul style="list-style-type: none"> <li>• Thoroughly study of Dynamics.</li> <li>• To learn motion with constant and variable acceleration and laws of motion.</li> <li>• To understand the concept of linear momentum, angular</li> </ul>

		<p>momentum, principle of impulse, and momentum.</p> <ul style="list-style-type: none"> <li>• Concept of projectiles, work, power and energy.</li> </ul>
V	<p>Paper-I Analysis-I</p>	<ul style="list-style-type: none"> <li>• Describe the fundamental properties of real numbers, i.e. countable and uncountable.</li> <li>• Study of Riemann integration and function of bounded variation.</li> <li>• Students will be able to understand improper integral and their convergence.</li> <li>• Study of Abel's, Dirichlet's test, Frullani's integral.</li> <li>• Concept of integral as a parameter.</li> </ul>
	<p>Paper-II Modern Algebra</p>	<ul style="list-style-type: none"> <li>• Understand the importance of algebraic structure with regard to working with in various number systems.</li> <li>• Generate groups given specific conditions and homomorphism of groups.</li> <li>• Students will be able to define rings and sub rings and ring homomorphism.</li> <li>• Study of ideals and concepts related to ideals.</li> <li>• Study of integral domain, discussion ring, field, Principal ideal domain, and Euclidean domains.</li> </ul>
	<p>Paper-III Probability Theory</p>	<ul style="list-style-type: none"> <li>• Review of notion of probability, conditional probability, and independence.</li> <li>• Students will be able to understand the concept of P.D.F and C.D.F of discrete and continuous random variable.</li> <li>• Study of Beta-gamma function.</li> <li>• Concept of Bivariate random variable.</li> </ul>
	<p>Paper-I</p>	<ul style="list-style-type: none"> <li>• Study of double and triple integrals.</li> <li>• Concept of vector integration.</li> <li>• To understand the concept of sequence and series of function.</li> <li>• Study of Fourier series.</li> </ul>

VI	Analysis-II	<ul style="list-style-type: none"> <li>• Study of volume integrals, i.e. Gauss Divergence theorem, Stoke theorem and Green theorem.</li> </ul>
	Paper-II Linear Algebra	<ul style="list-style-type: none"> <li>• Introduction to vector space and sub space.</li> <li>• Study of linear transformations and matrices.</li> <li>• To learn characteristics and minimal polynomial for linear operator.</li> <li>• To understand orthogonally and diagonalisation.</li> </ul>
	Paper-III Numerical Analysis	<ul style="list-style-type: none"> <li>• To apply appropriate numerical methods to solve the problem with most accuracy.</li> <li>• Using appropriate numerical methods determine approximate solution of linear equations.</li> <li>• Thoroughly study of interpolation.</li> </ul>

## **DEPARTMENT OF HISTORY**

### **Program Specific Outcomes**

- History is the most important laboratory for the social sciences. That is why it is called as the ‘mother’ of all subjects.
- History enables the students to know about the culture and traditions of the people who have lived at different periods.
- Polity, Constitution, and Law etc. all have their roots in the history. Mature understanding of these subjects requires the knowledge of History.
- All the major competitive examinations require knowledge of History, so it enables the students to have success in such examinations.
- History, particularly the history of Punjab is full of incidents of personal sacrifices for the collective welfare and for the protection of weak. Study of such incidents promotes moral values and a spirit of individual interests over the collective interests of the society.
- History of Punjab is full of incidents of struggle against social evils, particularly during the Sikh Gurus period. Still there are a number of social evils in the society. Knowledge of

Punjab history enables the students to develop moral values, a spirit of renounce social evils, and the manners of curbing such evils.

SEMESTER	PAPER	OUTCOMES
B.A. I	History of India (upto1200 AD)	<ul style="list-style-type: none"> <li>• Students will acquire the knowledge regarding the primitive life and culture of the people of Ancient India.</li> <li>• They will learn about the origin of Indian empire, trade and urbanization patterns of ancient civilizations like Harappa Civilization, Vedic Civilization, and Later Vedic Civilization etc.</li> <li>• Students learn about the various religious movements in ancient India like Buddhism, Jainism, and Asoka's Dharma.</li> </ul>
B.A. II	History of India (1200-1750 AD)	<ul style="list-style-type: none"> <li>• Students learn about the weaknesses in the political &amp; social structures of India and consequences subjugation to foreign invaders.</li> <li>• They learn about the political integration under Mughal rulers, and administrative, political, and military reforms under various rulers.</li> <li>• They also learn about the rise of Marathas and religious movements like Bhakti and Sufism.</li> </ul>
B.A. III	History of India (1750-1964 AD)	<ul style="list-style-type: none"> <li>• Students learn about the advent of British first a trading company and then becoming a political power in India and exploitation of its resources for the spread of their empire.</li> <li>• Students learn about the rise of nationalism as a reaction against the foreign rule and various social reforms movements.</li> <li>• Students learn about the constitutional development in India.</li> </ul>

B.A. IV	History of Punjab ( 1469-1966)	<ul style="list-style-type: none"> <li>• Students learn about the socio-religious reforms under the various Gurus.</li> <li>• Students learn about the consolidation of people's power against totalitarian Mughal monarchies and consequent rise of small kingdoms or Missals.</li> </ul>
B.A .V	History of World ( 1500-1870)	<ul style="list-style-type: none"> <li>• Students learn about the various movements and events that have shaped the world politics like the French Revolution.</li> <li>• They learn about politico-religious changes like Renaissance and Reformation.</li> <li>• They also learn about rise of nationalism in various countries of the world leading to their political unification like Italy and Germany.</li> </ul>
B.A. VI	World History (1871-1991AD)	<ul style="list-style-type: none"> <li>• Students learn about the history of modern world in the period of European domination like New Imperialism and diplomatic developments in Europe.</li> <li>• Students learn about the First World War and Russian Revolution and their consequences.</li> <li>• Students learn about the Nationalism and communism in China and Great depression.</li> <li>• Students learn about the rise of racialism under various forms like Fascism and Nazism and their consequences for the world and concerned nations.</li> </ul>

## **M.A. HISTORY**

### **Program outcomes**

- History is a great domain to pursue, gradually it is becoming quite a popular subject. Post graduation in history paves way to different govt. jobs such as SSC, UPSC, IBPS, Bank, PO etc. students can work as a manager, Administrator, Lecturer, Political content writer/ journalist and archeologist etc.
- Students will have the ability to apply historical methods to evaluate critically the past and how historians and others have interpreted it. M.A history graduates can get a doctorate degree with a PhD in History. They can also clear the NET examination.
- Students should understand the basic skills that historians use in research and writing and also understand the basic tools of historical analysis and participate knowledgeably in the affairs of the world around them, drawing upon understandings shaped through reading, writing, and lectures concerning the past.
- Students should understand the value of diversity, interpret, evaluate, compare and critique historical arguments and also grasp the complexities of historical causation.
- Students will distinguish between Primary and Secondary sources and identify and evaluate evidence and students will produce their own historical analysis of documents and develop the ability to think critically and historically when discussing the past.
- Students will demonstrate in discussion and written work their understanding of different people and cultures in past environments and of how those cultures changed over the course of the countries.
- Students will demonstrate in written work and class discussions the ability to recognize and articulate the diversity of human experience, including ethnicity, race, language, situations and societies gender, as well as political, economic, social, and cultural structures over time and space.

## **DEPARTMENT OF POLITICAL SCIENCE**

### **Program Specific Outcome**

- Aristotle has rightly called Political science as the 'master science', as politics is responsible to decide the direction of a nation in other fields also.
- Political science helps to create a responsible citizenry, and a responsive leadership.
- Political science creates the awareness about the rights and a sensitization towards duties of the citizens.
- Knowledge of Political institutions of the country is necessary to ensure the responsible working of such institutions.
- Knowledge about the constitutional institutions and their working creates a pool of energetic young citizens, able to provide leadership to the nation in future.

- Most of the competitive examinations require knowledge of political institutions of the country, and constitutional provisions related with such institutions. Political science enables the students to understand the nature and working of these institutions and helps them to shine in such exams.

### **Program Outcomes**

- Educate students in both the artistry and utility of the English language through the study of literature and other contemporary forms of culture.
- Provides students with the critical facilities necessary in an academic environment-on the job, and in an increasingly complex, interdependent world.
- Assist students in the development of intellectual flexibility, creativity, and cultural literacy so that they may engage in life-long learning.
- Students should be familiar with representative literary and cultural texts within a significant number of historical, geographical, and cultural contexts.
- Students should be able to apply critical and theoretical approaches to the reading and analysis of literary and cultural contexts in multiple genres.
- Students should be able to identify, analyze, interpret and describe ideas, values, and themes that appear in literary and cultural texts and understand the way these ideas, values and themes inform and impact the culture and society.

	American Literature-II	<ul style="list-style-type: none"> <li>• To introduce the students the periods of American literature.</li> <li>• To introduce them a bunch of plays, poems, and fiction written by American authors and make the students know the trends of these from time to time.</li> </ul>

## **DEPARTMENT OF FASHION DESIGNING**

### **Program Specific Outcome**

- This course provides in-depth knowledge in the field as well as practical experience under the supervision no trained and accomplished fashion designing faculty.
- This can further help students to develop their creativity and help them better to “Think out of the box”.
- This course combines intense classroom training and industry training providing students with maximum exposure to the industry. This helps students find a foothold in the fashion industry in India and to maintain their growth.

<b>SEMESTER</b>	<b>PAPER</b>	<b>OUTCOMES</b>
	Basics of Design	<ul style="list-style-type: none"> <li>• Students learn about various drawing tools and coloring mediums.</li> <li>• Types of lines and shapes.</li> <li>• Introduction to different color and its dimensions.</li> </ul>

	Entrepreneurship Development	<ul style="list-style-type: none"> <li>• To prepare the platform where the students view entrepreneurship and self-employment as a desirable career option.</li> <li>• To orient the students with the basic principles involved in starting and managing a new enterprise.</li> </ul>

# **DEPARTMENT OF COMPUTER SCIENCE**

## **BCA Programme Outcomes**

- An ability to apply knowledge of computer science, mathematics in practice.
- An ability to enhance not only comprehensive understanding of the theory but its application too in diverse field.
- The program prepares the young professional for a range of computer applications, computer organization, and techniques of computer networking, software engineering, e-Commerce, Web development and JAVA.
- An ability to design a computing system to meet desired needs within realistic constraints.
- In order to enhance programming skills of the young IT professionals, the program has introduced the concept of project development in each language/technology learnt during semester.

## **Program Specific Outcomes**

- Focuses on preparing student for roles pertaining to computer applications and IT industry
- Start from the basics and in every semester learns each and everything about computers.
- Develop programming skills, networking skills; learn applications, packages, programming languages and modern techniques of IT.
- Get skill and info not only about computer and information technology but also in common, organization and management.
- Learn programming language such as Java, C++, HTML, SQL, etc...
- Information about various computer applications and latest development in IT and communication system is also provided
- Gives overview of the topics in IT like networking, computer graphics, web development, trouble shooting, and hardware and software skills.
- Bachelor in computer applications (BCA) gives a number of opportunities to individuals to go ahead and shine in their lives.

- A few of them being like software programmer, system and network administrator, web designer faculty for computer science and computer applications.

SEMESTER	PAPER	OUTCOMES
1 <sup>st</sup>	Computer Fundamental and Computing Software	<ul style="list-style-type: none"> <li>• Understand basic computer hardware architecture.</li> <li>• Understand the fundamental hardware components that make up a computer's hardware and the role of each of these components.</li> <li>• Understand the role of CPU and its components.</li> <li>• Learn essential IT support skills including installing, configuring, securing</li> <li>• Gain hands-on experience of working in Microsoft products such as: MS Word, MS Excel and MS PowerPoint.</li> </ul>
	Problem Solving through C	<ul style="list-style-type: none"> <li>• Learn how to build by the algorithms for problems.</li> <li>• Learn how to create pictorial representations of the program.</li> <li>• Know the concept of pointers, file handling, and input output operations.</li> <li>• Learn how to apply logic for problems.</li> <li>• Enhance their programming skills.</li> </ul>
1 <sup>st</sup>	Fundamental of Mathematical Studies	<ul style="list-style-type: none"> <li>• Students learn the basic techniques of Statistical Methods.</li> <li>• Students will be able to solve various Financial, Scientific and Engineering fields' problems.</li> </ul>

2 <sup>nd</sup>	Computer Organization	<ul style="list-style-type: none"> <li>• Given an introduction to digital computer and their fundamental architectures.</li> <li>• Able to define the function units of computer architecture</li> <li>• Input and Output peripheral devices and their communication with the rest of the computer components.</li> <li>• Able to find the various instruction type and addressing modes used for programming.</li> <li>• Functionalities and organization of processor units and their types.</li> <li>• Able to understand the basic programming unit and execution of instruction.</li> <li>• Computer arithmetic algorithm in signed magnitude data with hardware implementation and hardware algorithm.</li> <li>• Include the interrupts and direct memory access and clasp the standard I/O devices</li> <li>• Memory organization, hierarchy and organization. Able to aware of RAM, ROM, COST, SIZE, CACHE and virtual memory. Comprehend the need for improving cache perform</li> <li>• Grasp the different secondary storage devices</li> </ul>
2 <sup>nd</sup>	Fundamental of Web Programming	<ul style="list-style-type: none"> <li>• Understand the basic working of Internet and its main services.</li> <li>• Create web pages using HTML.</li> </ul>

		<ul style="list-style-type: none"> <li>• Understand, analyze and create web pages using HTML, DHTML, Cascading Styles Sheets and JavaScript.</li> </ul>

6 <sup>th</sup>	Computer Graphics and Multimedia Applications	<ul style="list-style-type: none"> <li>• Understand the basics of computer graphics, different graphics systems and applications of computer graphics.</li> <li>• The student will also learn about essential concepts used in developing multimedia applications.</li> </ul>

## **POST GRADUATE DIPLOMA IN COMPUTER APPLICATIONS (PGDCA)**

### **Program Outcomes**

- It will equip the students with skills required for designing, developing applications in Information Technology.
- Students will be able to learn the latest trends in various subjects of computers & information technology.
- The PG Diploma is aimed at graduates with a computing background and provides a detailed coverage of the key concepts and challenges in data and resource protection and computer software security.
- To give hands on to students while developing real life IT application as part of the study.
- To train graduate students in basic computer technology concepts and information technology applications.
- Design and develop applications to analyze and solve all computer science related problems

## **Program Specific Outcomes**

- To expose the students to open Source technologies so that they become familiar with it and can seek appropriate opportunity in trade and industry.
- Able to provide socially acceptable technical solutions to real world problems with the application of modern and appropriate programming techniques.
- Design applications for any desired needs with appropriate considerations for any specific need on societal and industrial aspects.

<b>SEMESTER</b>	<b>SUBJECT</b>	<b>OUTCOMES</b>
1 <sup>st</sup>	Computer Fundamentals	<ul style="list-style-type: none"><li>• Students familiar with basic concepts related to Computers, DOS, Windows, Linux and application software's like Word-processing, Spreadsheet Software and Presentation Software.</li></ul>
1 <sup>st</sup>	Computer Programming Using C	<ul style="list-style-type: none"><li>• Understand the fundamentals of C programming. Students will acquire knowledge and skills of programming.</li><li>• Students will be able to develop logics which will help them to create programs.</li><li>• Also by learning the basic programming constructs they can easily switch over to any other language in future.</li></ul>
1 <sup>st</sup>	Data Base Management System	<ul style="list-style-type: none"><li>• It aims at acquainting students better with the basics of DBMS, different Architectural Models for DBMS, Normalization of data, Concurrency control problems and its management, Protection, Security and recovery aspects of databases along with practical</li></ul>

		knowledge's of databases using SQL and PL/SQL. The key goal is to prepare students for a professional career in the field of data administration and database design.
1 <sup>st</sup>	Data Communications and Networks	<ul style="list-style-type: none"> <li>• Familiar with the different Network Models</li> <li>• Understand different protocols working at Medium Access Sub layer.</li> <li>• Learn the concept of network routing through algorithms.</li> <li>• Learn and understand Internet protocols and network security.</li> </ul>

	Web Technologies	<p>Web Services.</p> <ul style="list-style-type: none"> <li>• Describe and differentiate Programming Language and Markup Language</li> <li>• Connect various web pages and web sites together.</li> <li>• Capture user input from the remote users.</li> <li>• Learn connectivity concepts of Front End and Back End.</li> </ul>
2 <sup>nd</sup>	Software Engineering	<ul style="list-style-type: none"> <li>• Know develop the software project</li> <li>• Learn developing methodology of software project</li> <li>• Understand tools and techniques of software engineering</li> <li>• Verify and validate the problem of software programming</li> <li>• Maintain the quality of software project</li> </ul>
2 <sup>nd</sup>	Computer Based Accounting	<ul style="list-style-type: none"> <li>• Students understand accounting principles and computerized accounting.</li> <li>• Working with statistical and accounting data</li> <li>• Maintaining files and records</li> </ul>

## **M.SC.(IT) PROGRAMME OUTCOMES**

- Provides technology-oriented students with the knowledge and ability to develop creative solutions.
- Develop skills to learn new technology.

- Apply computer science theory and software development concepts to construct computing-based solutions.
- Design and develop computer programs/computer-based systems in the area related to algorithms, networking, web design, cloud computing, Artificial Intelligence.

### **Program Specific Outcomes**

- Demonstration of the knowledge of advanced programming skills and distributed environmental need for sustainable development.
- Ability to design and develop software in emerging technological environments.
- Ability to solve problems using the techniques of data analytics like pattern recognition and knowledge discovery.
- Ability to work out effective and efficient real time solutions using acquired knowledge in various domains.
- Apply the learning from the courses and develop applications for real world problems.

<b>SEMESTER</b>	<b>PAPER</b>	<b>OUTCOMES</b>
1 <sup>st</sup>	Linux Administration and Programming	<ul style="list-style-type: none"> <li>• Students get familiar with Linux system, its commands, files &amp; directories, system, shell programming, PERL programming and system administration.</li> <li>• Students will be able to Work in the Linux environment for Linux server administration.</li> <li>• Write the shell programs, PERL programs and C-program with system calls.</li> </ul>
	Software Engineering	<ul style="list-style-type: none"> <li>• Aware about the engineering approach to analysis, design and built the software</li> <li>• Understand the phases and activities involved in the software life cycle models</li> </ul>

3 <sup>rd</sup>	Systems Approach to Management and Optimization Techniques	<ul style="list-style-type: none"> <li>• Students will be familiar with different types of Info systems</li> <li>• Formulate a real-world problem as a mathematical programming model</li> <li>• Understand the theoretical workings of the simple method for linear programming and perform iterations of it by hand</li> <li>• Understand the relationship between a linear program and its dual.</li> <li>• Perform sensitivity analysis to determine the direction and magnitude of change of a models optimal solution as the data change</li> <li>• Solve specialized linear programming problems like the transportation and assignment problems</li> <li>• Solve network models like the shortest path</li> </ul>

## **BA (Computer Science)**

### **COURSE OUTCOME**

#### **Computer Fundamentals**

- Understand the fundamental hardware components that make up a computer's hardware and the role of each of these components. Understand the role of CPU and its components.
- To impart comprehensive knowledge with equal emphasis on theory and practices.

#### **PC Software**

- Learn the basic functionality of Disk Operating System & Windows.
- Create word processing, spreadsheet & presentation documents.

#### **Operating System Concepts**

- Identify the role of different components of operating systems.
- Implement various strategies for task management in operating systems.
- Explain various implementation issues in operating systems.
- Discuss how various resource managements are implemented in operating systems.

#### **C Programming**

- Students learn the different steps to develop a program
- Understand the fundamentals of C programming. Students will acquire knowledge and skills of programming.
- Students will be able to design programs using array, functions, strings etc.

#### **Computer Organization**

- Explains number systems and convert number systems.

- Explains logical AND, OR, NOT, NAND, NOR, EX-OR, EX-NOR functions.
- Understand the fundamental organization of a computer system
- Explain instruction formats and instruction cycle.
- Learn Microprocessor and System maintenance.

### **Object Oriented Programming (using C++)**

- Understand Object oriented approach for finding solutions to various problems with the help of C++ language.
- Create computer based solutions to various real-world problems using C++

### **Database Concepts**

- Understand database concepts and structures.
- Understand the objectives of data and information management.
- Understand data modeling and database development process.
- Construct and normalize conceptual data models.
- Understand data integrity, Concurrency, Security and recovery.

### **Data Structure**

- Students learn various data structures like array, linked list, stack and operations performed on them using algorithms.
- They will be capable to implement these operations using any programming language.
- They learn various searching and sorting techniques.

### **Project Management**

- Understand project characteristics and various stages of a project.
- Understand the conceptual clarity about project organization and feasibility analyses – Market, Technical, Financial and Economic.
- Analyze the learning and understand techniques for Project planning, scheduling and Execution Control.

- Write Project Reports.

### **Relational Database Management System**

- Master the basics of SQL and construct queries using SQL.
- Be familiar with a commercial relational database system (Oracle) by writing SQL using the system.
- Usage of DML and TCL statements.
- Master the basics of PL/SQL Composite Data types like Procedures, Functions, Packages and Triggers.

### **E-Commerce**

- Understand about Ecommerce, Internet and WWW.
- Learn Web designing and hosting, different methods of payments.
- Understand the Firewall and network security.

### **Web Programming**

- Students learn the basics of website designing (HTML, CSS).
- They will be able to find the difference between static and dynamic websites.
- They understand the server side scripting language(PHP).

## **DEPARTMENT OF COMMERCE**

This program aims to provide students with specific knowledge and skills relevant to their discipline and careers. After completing two year of Masters of commerce (MCOM) and three years for bachelors in Commerce (BCOM) program, students would gain a thorough grounding in the fundamentals of Commerce and Finance which offers a number of specializations and practical exposures for the students to face the modern day challenges in different professional bodies.

This program could well train the professionals for the industries, banking sectors, insurance companies, financing companies, transport agencies etc., to meet the well trained manpower requirements. The broader perspective of this program offers a number of values - based and job oriented courses which ensure that the students are trained into up-to-date. In advanced accounting courses beyond the introductory level, provide students with the analytical, evaluative and problem solving skills commensurate with degree level higher education. At the end of BCOM degree course, by virtue of the training, they can become a manager, accountant, management accountant, cost accountant, bank manager, auditor, company secretary, teacher, and professor, stock agents, govt. jobs etc.

### **PROGRAM SPECIFIC OUTCOME (PSO)**

- Develop a critical awareness & understanding of the main functional areas of business administration and management process within a variety of institutional and organizational contexts.
- Utilize their knowledge, understanding and skills to work successfully in a professional business house.
- To demonstrate an understanding if the principles of accounting, finance, economic and business law.
- To develop mental abilities of students.
- To inculcate writing skills and business correspondence.
- To acquire practical skills related with banking and other business.
- To develop knowledge about economic environment of country as well as world.
- To demonstrate progressive learning of various tax issues and tax forms related to individuals so that learners can also acquire practical skills to work as tax consultant, audit assistant and other supporting services.
- To demonstrate knowledge in setting up a computerized set of accounting books.

### **COURSE OUTCOMES OF B.COM**

- To build a strong foundation of knowledge of commerce in different areas.
- To develop the skills of various techniques used in commerce.

- To develop an attitude for working efficiently and effectively in a business environment.
- To develop an attitude of strong morale in stiff competition.
- To promote students about entrepreneurial development.
- To integrate knowledge, skill and attitude of commerce that will sustain for business environment to learn creativity among the students.
- To enable a student to be capable of making decision at personal, professional and entrepreneurial level.
- To develop a strong platform of commerce activities.
- To develop the knowledge of statistical tools used in business analysis
